REGISTER STUDENTS FOR CHEMISTRY COURSES;
PRODUCE TEACHING AIDS, DICTIONARY, TEXTBOOKS

STATE INDUSTRIAL SCHOOL ACCEPTS STUDENTS IN CHEMISTRY -- Sarajevo, Oslobođenje, 7 Sep 51

Registration for the first class of the 1951 - 1952 school year in the Secondary Industrial Chemistry School at the Lukavac Soda Plant will be held from 25 August to 19 September.

Courses are for 3 years and consist of theoretical and practical studies. Upon their conclusion, students take a final examination and receive a certificate giving them the rank of trained workers in chemistry.

Applications, which are taxed 10 dinars, must be submitted in person or sent to the school by 10 September 1951. The following are also required: evidence of citizenship, birth certificate, certificate showing completion of work in the lower Gymnasium and passing of the examination concerned, or completion of work in any other school of the same level and passing of the examination concerned, medical certificate, certificate of good behavior from those who are not coming directly from school, and affidavit from parents that upon completion of courses students will remain at least 6 years in enterprises of the Main Directorate of the Chemical Industry of Bosnia-Herzegovina.

Students whose parents do not reside in Lukavac must also submit applications for acceptance in the boarding school and affidavits from the people's authorities as to the number of members in their immediate family and the income of each.

Applications unsupported by documentary evidence will not be considered.

MAKES TEACHING AIDS, LABORATORY GLASS -- Zagreb, Narodni List, 6 Sep 51

The "Učila" (Teaching Aids) Factory in Zagreb produces teaching aids and laboratory glass, previously imported. The factory's products include relief maps, geographic maps, globes, school boards [blackboards?], calculators, boxes with models showing molecular structure, mineralogical collections, test tubes, school "libele" [?], coolers, pipettes, and various other equipment for school laboratories.

The factory also has a taxidermy section which provides schools with mounted birds, animals, fish, anatomic displays, etc.

In addition to laboratory glass for schools, laboratories, and industry, the glass-blowing shop has produced 200 school thermometers. The factory would like to produce industrial, meteorological, and medical thermometers but lacks the necessary equipment and skilled personnel for this type of production.

The factory does not possess a single piece of equipment for graduating. Graduating on globes, thermometers, mensuration equipment, etc., is done by hand. There is a shortage of pens in the cartographic section, pins and dyes in the taxidermy section, etc.

COMPILE FIRST MACEDONIAN DICTIONARY -- Zagreb, Borba, 10 Oct 51

Skoplje, 9 October -- In January 1951, work began on compiling the first dictionary of the Macedonian language. The past months have been devoted primarily to extracting material from literary masterpieces and other literature on the arts and compiling a list of words from 19th-century writings. Many teachers, graduates of the Macedonian Language Office, and other cultural workers have forwarded a large number of words used in individual sections of Macedonia.

Material is to be collected until the beginning of 1952. The dictionary is to contain over 30,000 words. Every word is to be translated into French and Russian to permit later compilation of French-Macedonian and Russian-Macedonian dictionaries.

PUBLISH NEW TEXTBOOKS -- Zagreb, Borba, 18 Sep 51

Ljubljana, 17 September -- A new series of textbooks for the new school year have been assured in Slovenia. In the past few months, the State Publishing House has issued 97 new textbooks for elementary, secondary, technical, and advanced schools. Twenty eight additional textbooks for elementary and secondary schools and 16 for [college?] students are in preparation.
